

Lorenzo Ambrosini

PORTFOLIO

Lorenzo Ambrosini

I believe that the planning part of a work is a fundamental phase in order to create a good service or product, since the aesthetic aspect does not work for its own sake, but it should be supported by a proper designing. For these reasons my way of working and planning is systematic and well organized when I am given a project to work on. I organize my ideas following a bottom-up scheme, I start by solving small problems and then moving on to bigger ones.
